

Filip Enculescu

FRONTEND DEVELOPER

I am a developer passionate about Javascript language . Also I am an autodidact person and I spend my free time learning something new or developing some heavy application on my PC. If I had to choose a single word that describes me, it would be PERSISTENCE. I have been working on agile teams using Scrum most of the time, and I love the startup environment. Thank you for reviewing my curriculum.

EXPERIENCE

SENIOR FRONTEND DEVELOPER - ING BANK

Frontend developer working for ING bank and occasionally Scrum Master in charge of the frontend team. A part of that, I am analyzing new features and creating stories for our team. Also I am the main creator of a testing tool used to speed up end-to-end testing flows and deployments using Azure pipelines.
React - Angular - NextJS - Web Components - Jest - Azure devops

2021 - 2023
(2 years)

SENIOR FRONTEND DEVELOPER - NEWBLACK

Build intuitive applications to help people buy products easier and more secure. Extend functionalities and resolve performance issues. Apart of developing, I am in charge of making deployments to production and code quality reviews.

Angular 12 - Typescript - SASS - React - NextJS - Ionic 5

2019 - 2021
(2 years)

STARTUP CTO & DEVELOPER - JOBLINK

Co-Founder and full-stack developer working to build the first freelance-recruiting platform for Recruiters and candidates. Design MVP requirements, create tasks for the team, choose the right technologies and supervise the execution. Also helping as a developer on backend OR frontend when needed.

Angular 9 - Typescript - SASS - Ionic 5 - React Native - NodeJS - SQL - WebSockets - Stripe - MongoDB - AWS - Chrome Extensions

2017 - 2019
(2 years)

SENIOR FRONTEND DEVELOPER - NATO (NCI AGENCY)

Contracted as AngularJS expert to solve performance issues and to develop new functionalities for the current military application (TOPFAS Project). Also for development of a new mobile applications using Angular and Ionic.

AngularJS - IE - Angular 6 - Ionic 3 - SASS - Bootstrap / Material

2014 - 2017

(3 years)

FULLSTACK DEVELOPER - MOVE4TALENT S.L

Development of the POS (Point of sales) and ADMIN (Dashboard) for multiple formats (desktop, tablet & mobile), both backend as frontend along my team. This was my first job as a developer and gained a lot for experience here.

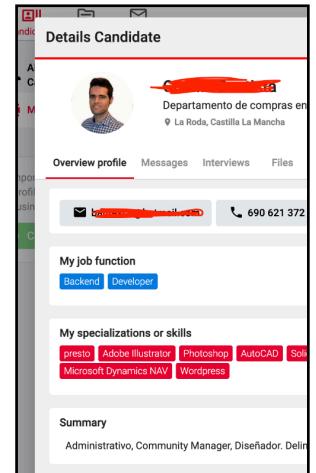

AngularJS - AWS - NodeJS - CSS3 - HTML5 - WebSockets - Firebase - jQuery - Cordova - Ionic - PHP - Memcache.

(JOBLink) - CoFounder & Developer

During my instance at NATO I came up with an idea to create a platform for Recruiters to make easier find new candidates and share them with other Recruiters via freelancing collaboration. So, my co-founder (Adrian) and me created a team of five developers and started building our application.

I was in charge of:

- Design the MVP requirements based on the feedback we had from the initial customers.
- Help the team to design the architecture of frontend (Angular) and backend (NodeJS, ExpressJS...)
- Search the best payments provider and make the integration with it (Stripe).
- Build the messaging part of the application using web sockets and MongoDB.
- Talk with customers to interate and improve our product (weekly).
- Developed a chrome extension to help Recruiters capture more easy the candidates profiles.
- Built the public website for the startup to engage first users to use the platform.
- Built the admin side app to manage accounts and to analize the usage of the application (analitics).
- Built a small version of our platform to run natively on desktop using Angular & ElectronJS.
- Setup, deploy and maintain our servers, SPA applications and other services on AWS.
- ...and of course helping my team as as developer...

The landing page for the JOBLink hiring platform. It features a hero section with the title 'Hiring Platform for Freelancers Recruiters' and a subtext 'JOBLink helps you manage the tedious work of finding candidates and make organizing the hiring process easy and attractive.' Below this are four cards showing profiles of candidates: '#devops #networks', '#system-admin', '#angular #javascript', and '#nodejs #php #java'. To the right is a sign-up form with fields for 'First Name', 'Last Name', 'Email', and 'Password', and a button 'Start now - It's free'. A note says 'Sign up in 10 seconds'.

The JOBLink dashboard for a user named 'Good evening, Philip'. On the left is a sidebar with 'Dashboard', 'Agenda', and 'TEAMS'. The main area shows 'Todos' tasks: 'adrian' (0), 'Software developer' (0), 'Prueba error 3' (0), 'Título nuevo' (0), 'Junior Fullstack Developer' (26), and 'Developer PHP' (8). To the right is a calendar for February 2022, showing no upcoming meetings. A message at the bottom right says 'No upcoming meetings.'

The pipeline management interface for the JOBLink platform. It shows a grid of candidate profiles categorized by status: 'Leads' (26), 'Sourced' (12), 'Applied' (12), 'Contacted' (12), and 'Interview' (12). Each card includes a photo, name, and a star rating. At the top, there are filters for 'Junior Fullstack Dev...', 'Pipeline', 'NOTES', 'JOB INFO', and a search bar. Below the grid is a sidebar with sections for 'All Network Candidates' and 'My Portfolio'.

A search results page for 'Analista GGS trabajando en NH Hotel Group'. It shows three candidate profiles: 1. 'Actual: Analista GGS trabajando en NH Hotel Group' (Titular: Recepcionista administrativo, Backend, Developer, Mercadotecnia, Microsoft PowerPoint, Gestión de ventas, Relaciones públicas, Gestión de eventos). 2. 'Virtual: Community Manager y Diseñador Gráfico trabajando en Dumont...' (Titular: DigitalMarketing/Diseño Gráfico, Frontend, Backend, Mobile, Developer, Full Stack, Digital Marketing, Google Adwords, Excel, Marketing, Adobe Illustrator, Social Ads, Ingle...). 3. 'Titular: Desarrollador Web Junior' (Frontend, Mobile, Backend, Systems Admin, DevOps, Full Stack, HTML5, Laravel, MongoDB, PHP, Node.js, JavaScript, SQL, CSS, Bootstrap, Query, Android...). Each profile has a 'More details' and 'Remove Profile' button.
